Client's Request

"We need a financial app that turns scattered bank, card, payroll and crypto data into one clear picture, in real time."

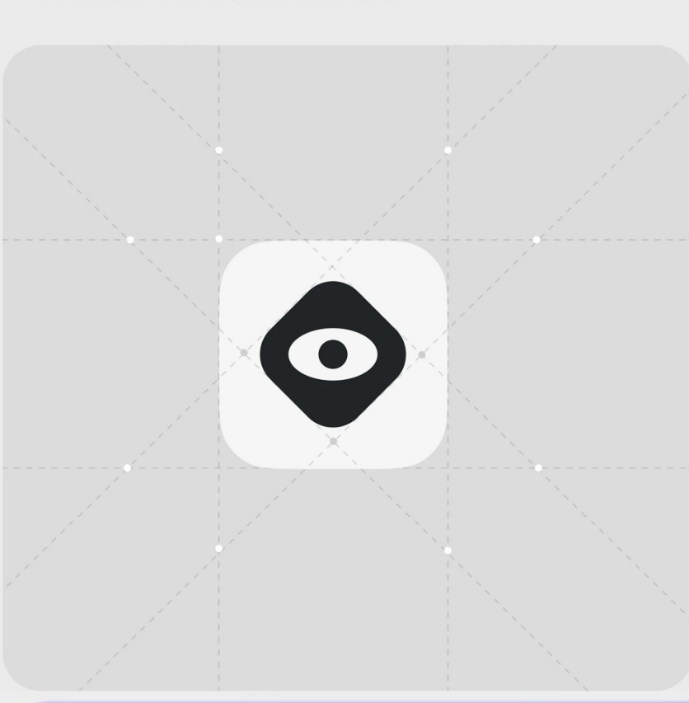
Jordan Reyes
Co-Founder & CEO, Pulse

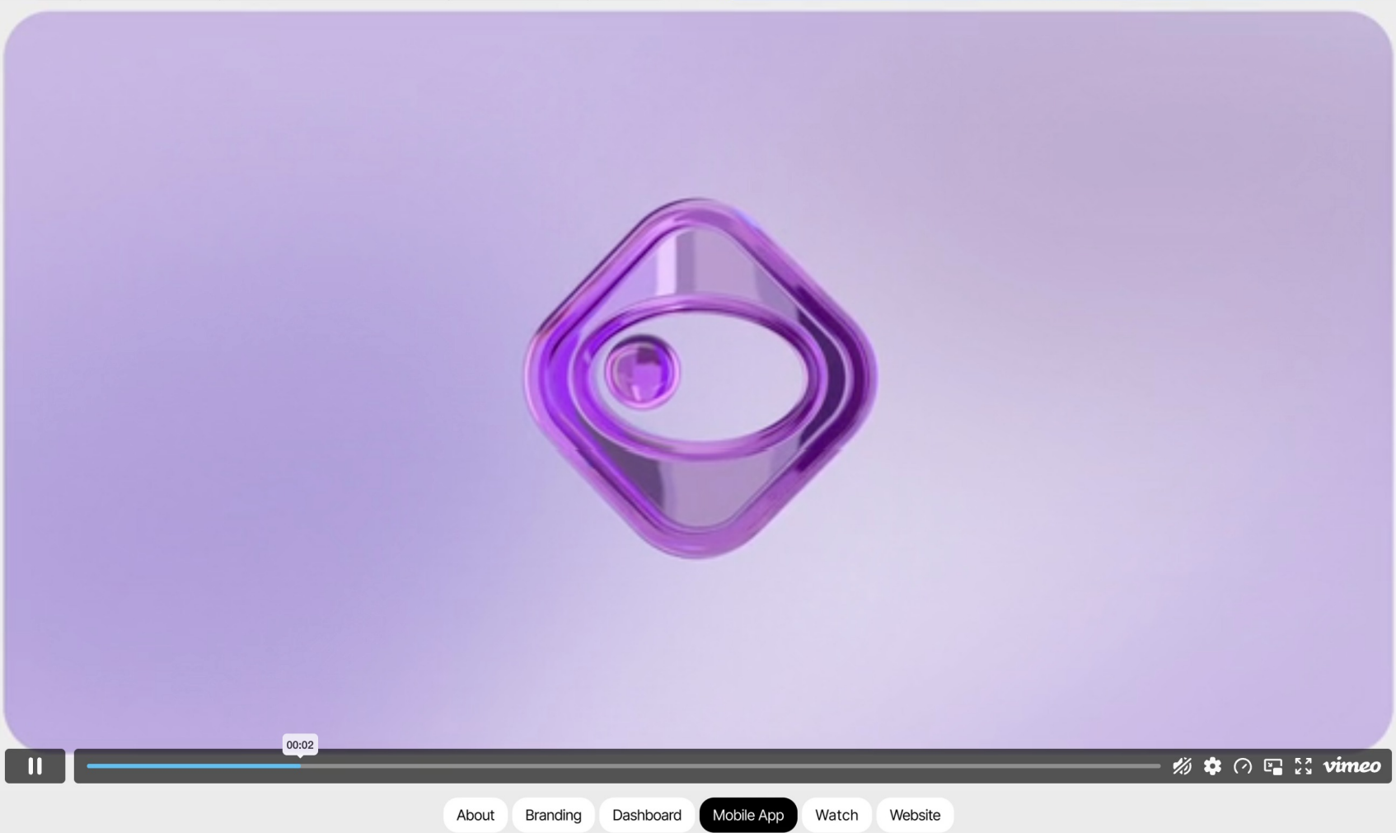
About · Branding · Dashboard · Mobile App · Watch · Website

Pulse is an AI-powered financial analyst built for founders who need clarity without hiring a finance team. It pulls bank, card, payroll, and crypto data into a single live dashboard, flags anomalies before they become problems, and answers plain-language questions about cash, spend, and runway.

Designed for early-stage startups and lean finance teams, it replaces spreadsheets and scattered logins with one trustworthy source of truth. The data model behind every number, the copy and the motion were built hand in hand with Claude.

Project Name	Pulse
Location	San Francisco, California
Year	2026



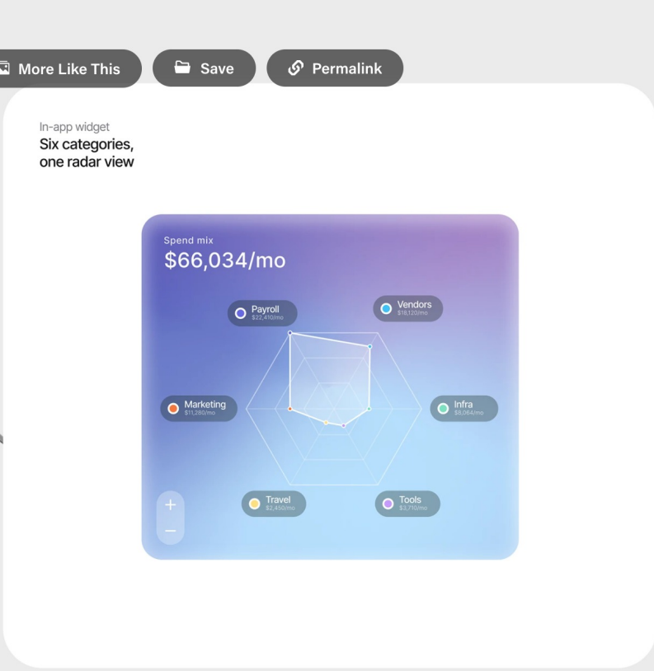


About · Branding · Dashboard · Mobile App · Watch · Website

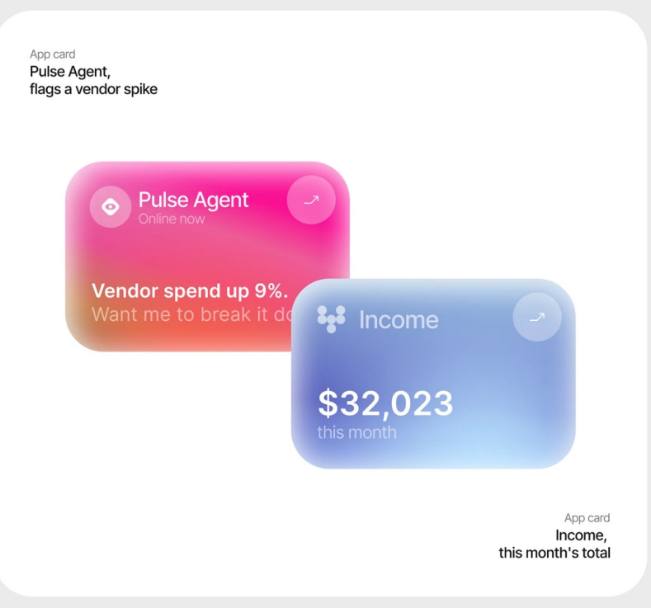
Know the numbers first. Spend, burn, income.

OVERVIEW SCREEN

See where the money goes, how fast it burns and what comes back in. So you can cut costs early, plan the next hire and walk into investor calls with real numbers.

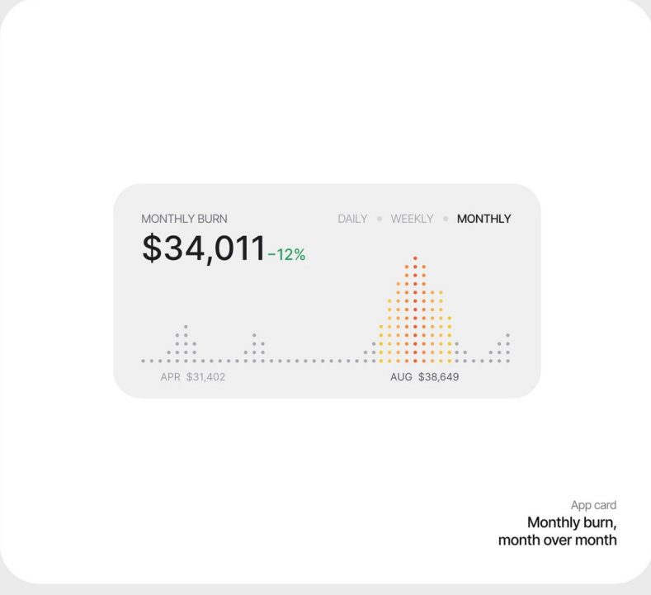


In-app widget
Six categories, one radar view



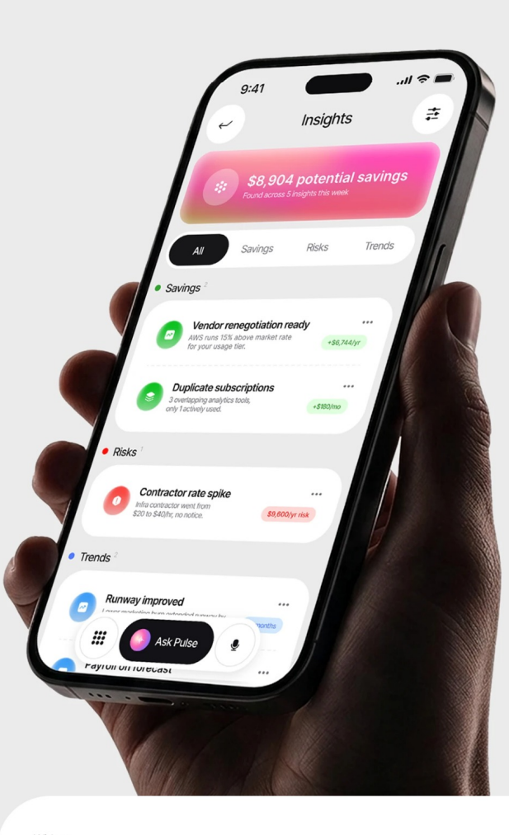
App card
Pulse Agent, flags a vendor spike

App card
Income, this month's total



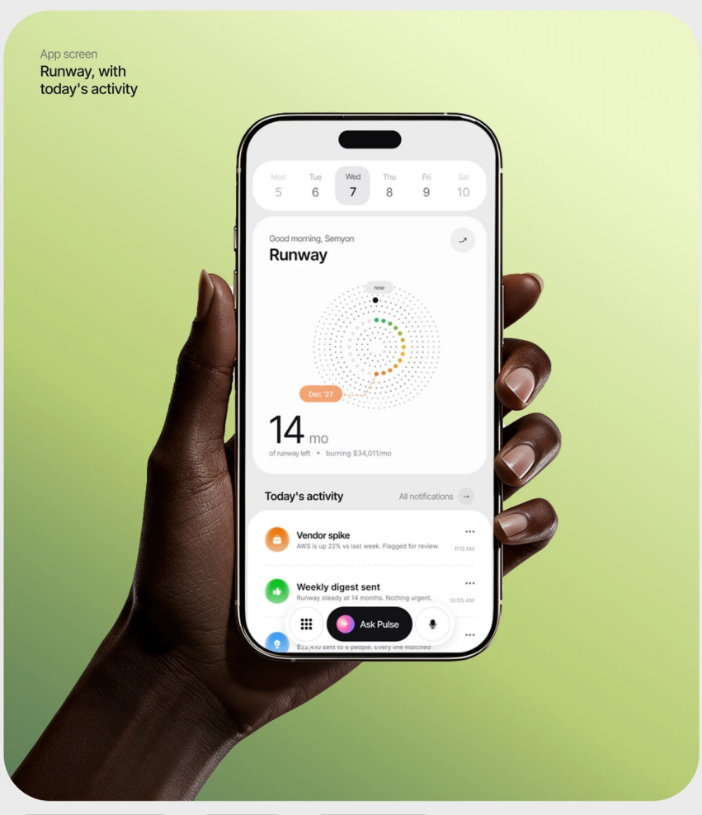
App card
Monthly burn, month over month

Pulse finds the signals, you make the call.

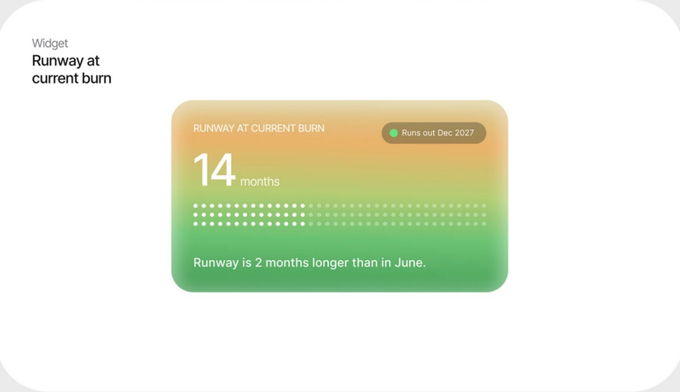


INSIGHTS

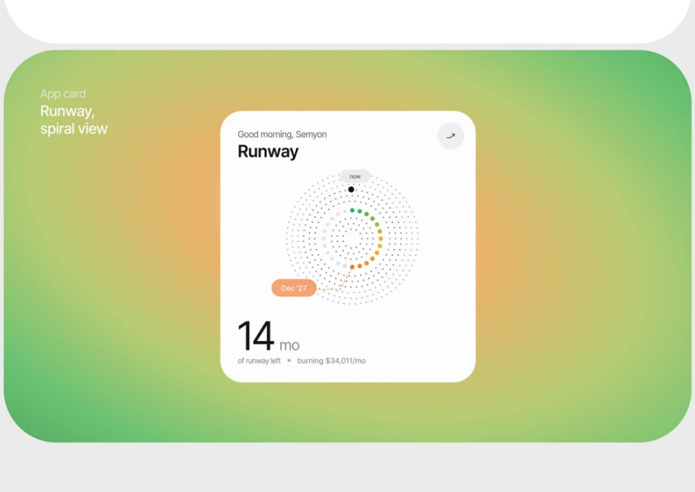
Every insight Pulse picks up lands here: a vendor that raised prices, a subscription nobody uses, a runway that just got longer. Each one comes with the numbers behind it, so you can act on it, park it or let it go. Not sure yet? Ask Pulse right from the card and talk it through.



App screen
Runway, with today's activity



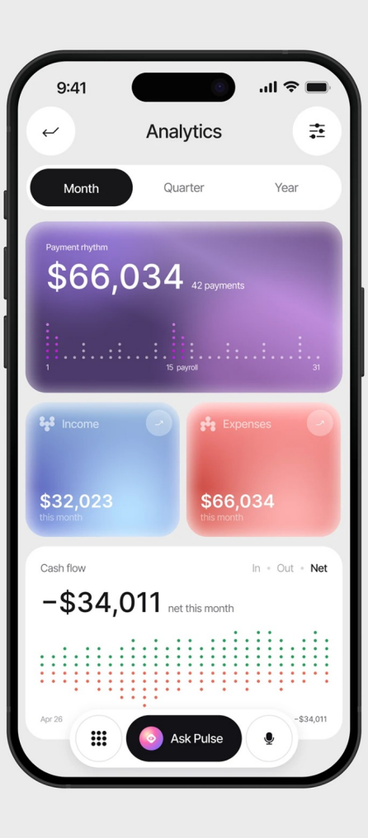
Widget
Runway at current burn



App card
Runway, spiral view

About · Branding · Dashboard · Mobile App · Watch · Website

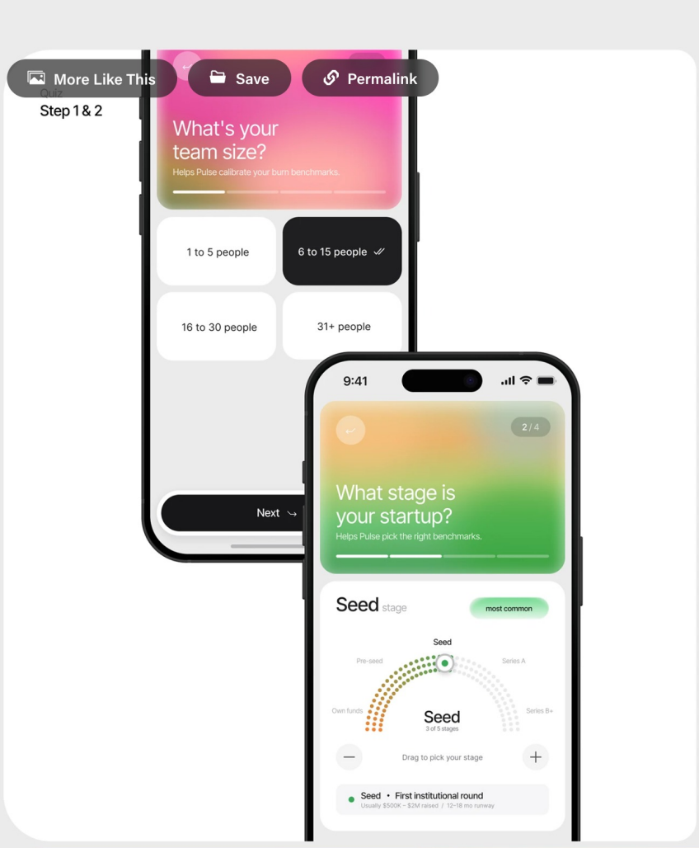
Know when it goes out. Income, expenses.



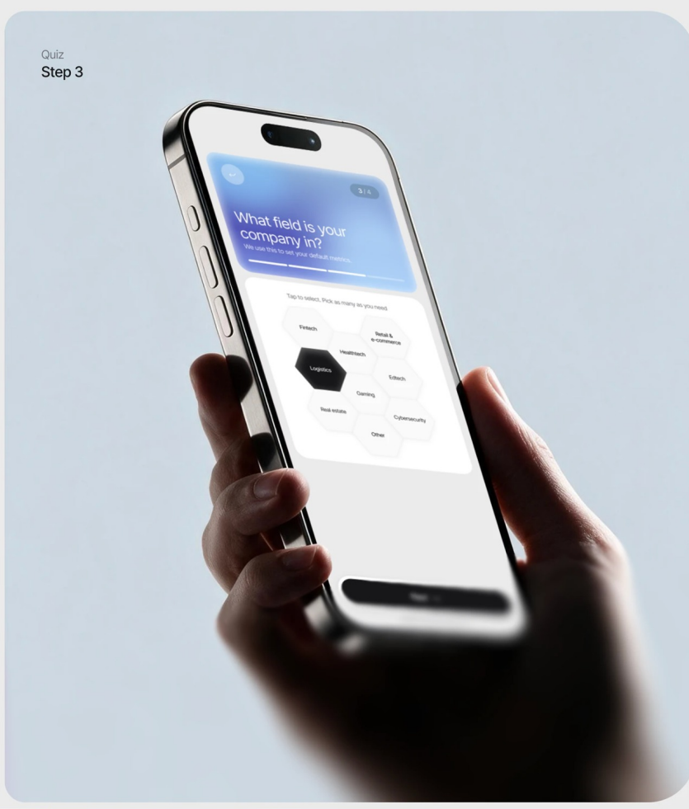
ANALYTICS SCREEN

See how money moves in and out, and how steady the payments are. So surprises show up in the chart, not in the bank account.

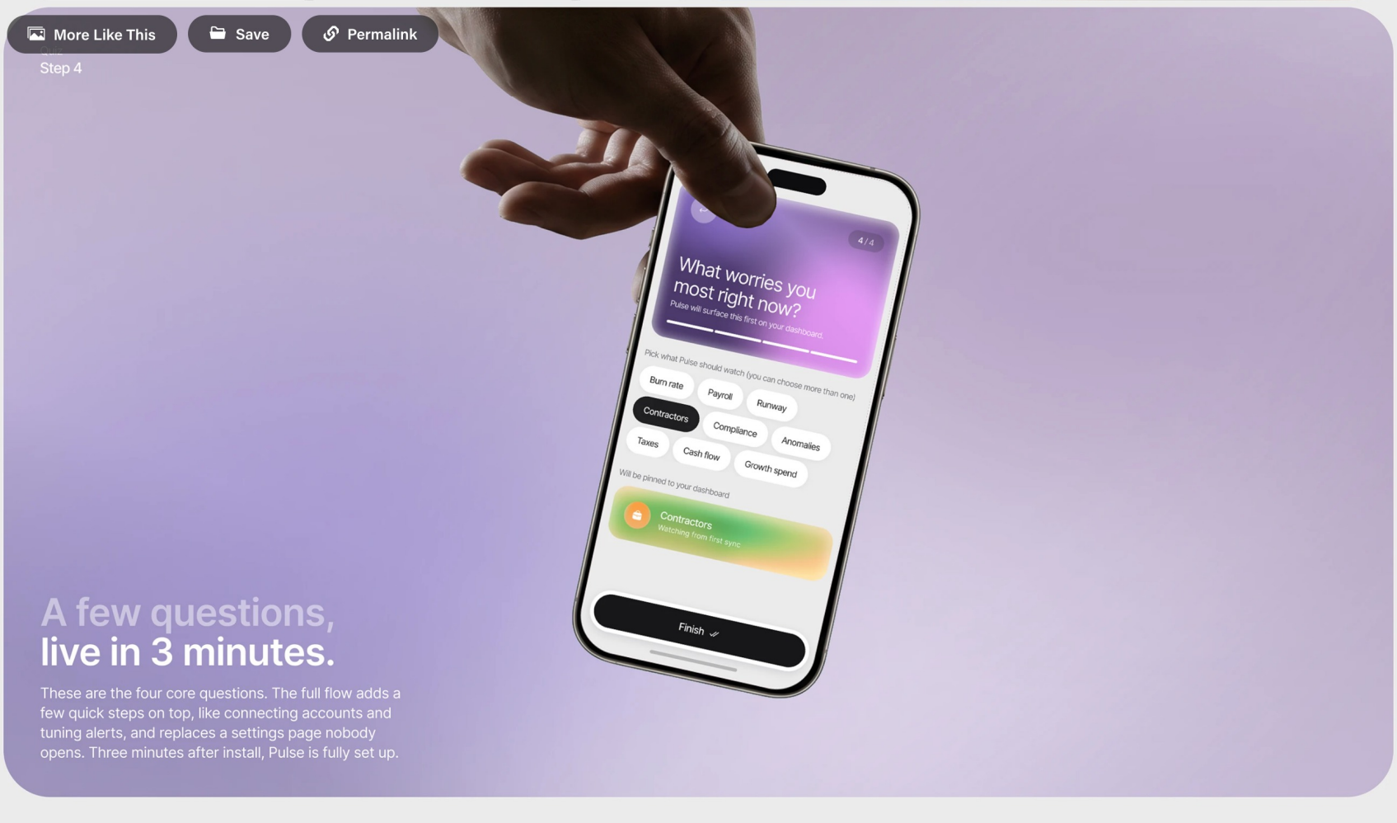
Payment rhythm shows when money actually leaves: payroll on the 15th, a cluster of SaaS renewals at month end, a vendor who suddenly bills twice. Income and expenses sit side by side, and net cash flow underneath tells you whether the month helped or hurt the runway.



Step 1 & 2



Quiz
Step 3



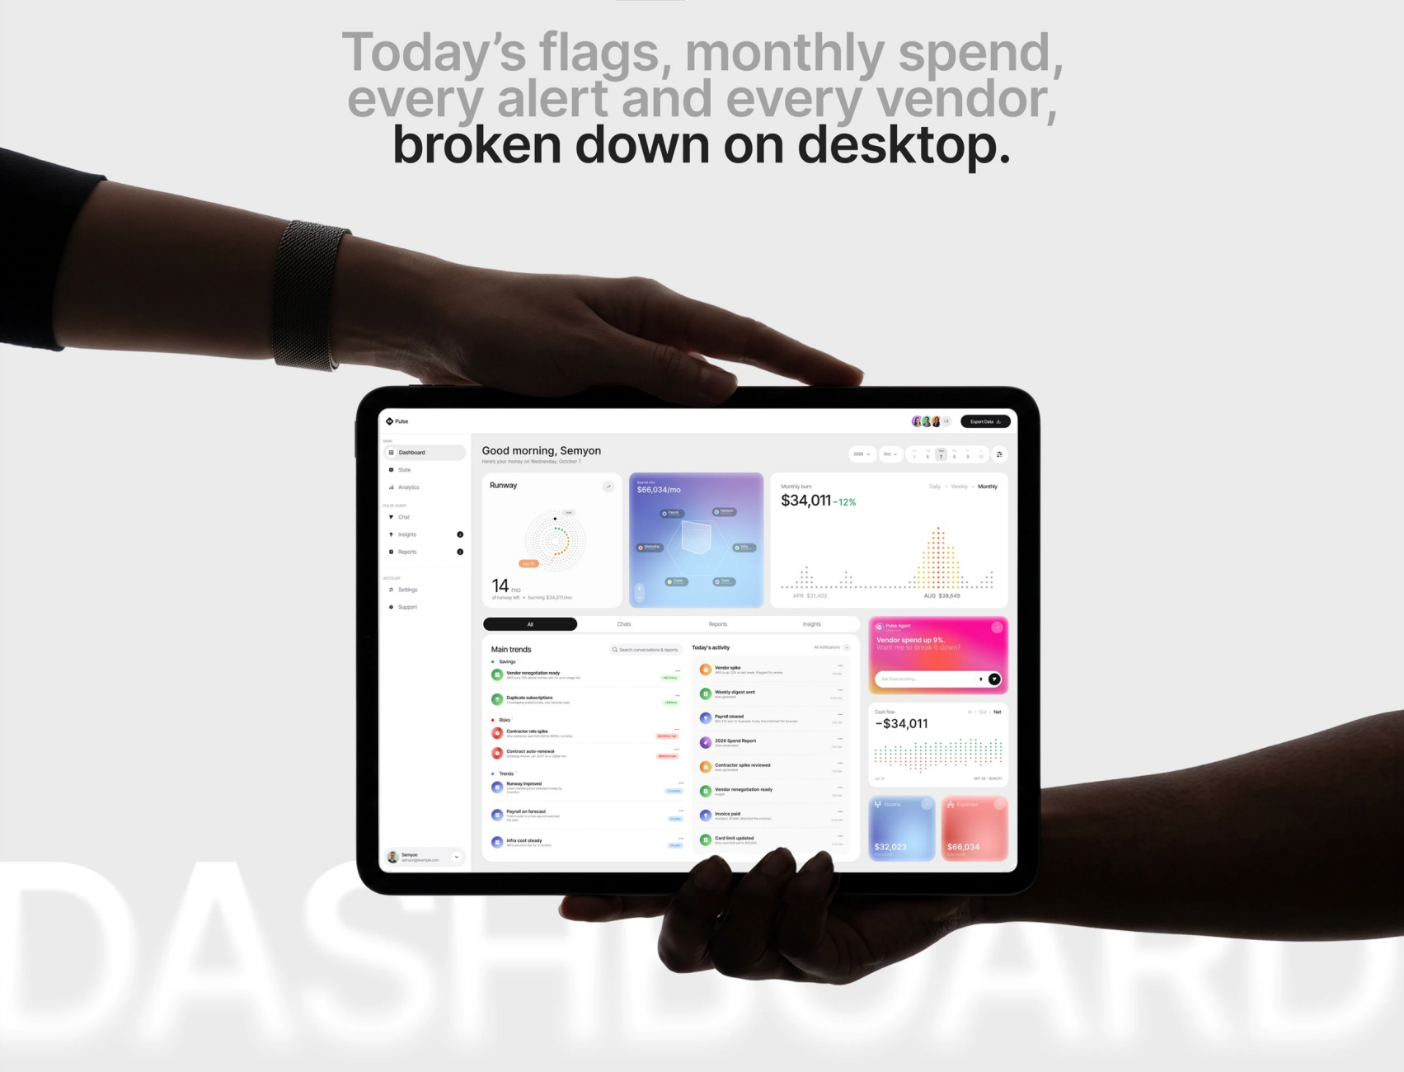
Step 4

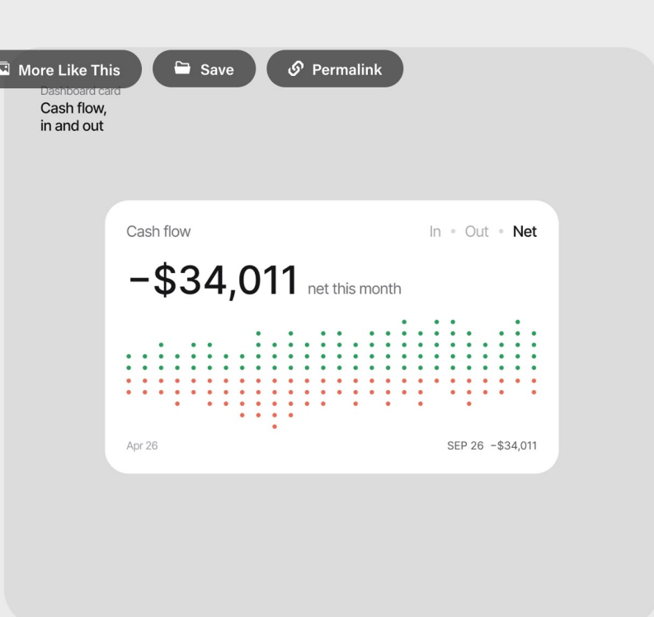
A few questions, live in 3 minutes.

These are the four core questions. The full flow adds a few quick steps on top, like connecting accounts and tuning alerts, and replaces a settings page nobody opens. Three minutes after install, Pulse is fully set up.

About · Branding · Dashboard · Mobile App · Watch · Website

Today's flags, monthly spend, every alert and every vendor, broken down on desktop.

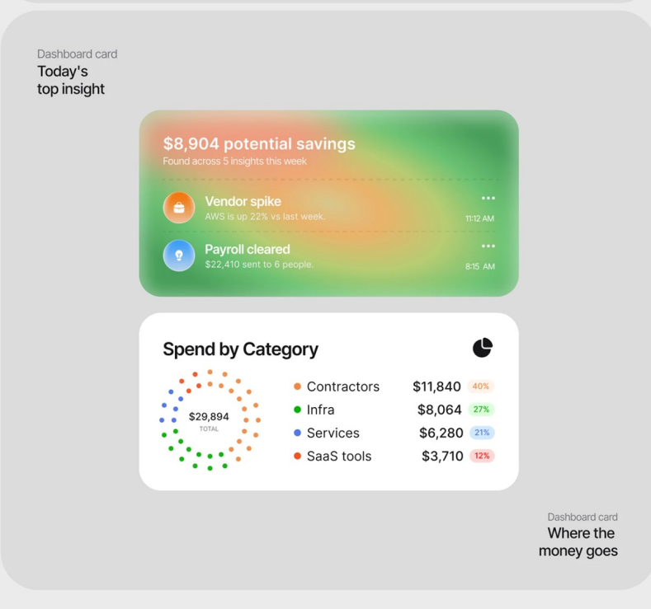




Dashboard card
Cash flow, in and out

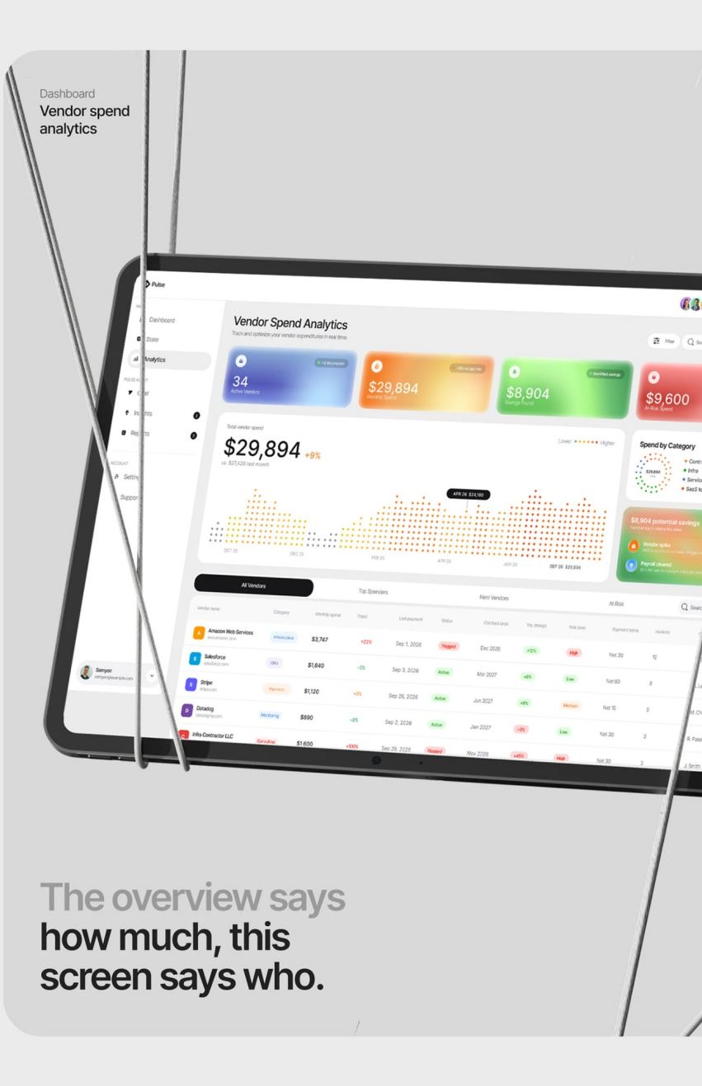
DASHBOARD

The app's card system, scaled to desktop. One data model behind it, built with Claude, so every number adds up.



Dashboard card
Today's top insight

Dashboard card
Where the money goes

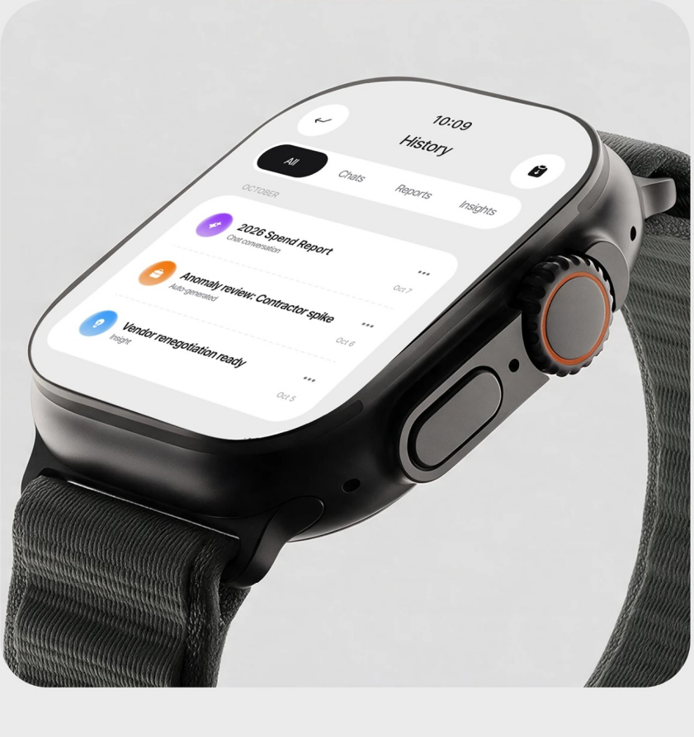


Dashboard
Vendor spend analytics

The overview says how much, this screen says who.

About · Branding · Dashboard · Mobile App · Watch · Website

Vendor spend, savings, alerts, every number that can't wait, right on your wrist.



INSIGHTS SCREEN

Everything urgent lands on the wrist first: savings worth taking, a cost that suddenly jumped, a payment that didn't go through. You see it the moment it happens and act on it with one tap.

About · Branding · Dashboard · Mobile App · Watch · Website

Early access · AI CFO for startups

Keep a hand on the pulse of your finances.

Pulse starts with what a founder checks every morning: cash, runway and burn. Connect in five minutes. The rest of the finance desk is on its way.

Join early access → · Watch demo

Four views to start. More on the way.

Cash, runway, spend and an agent you can ask. The first release covers the essentials. Each update adds more.

Your money, one view
Every account rolled into a single balance, updated the moment anything moves.

Know your runway
See exactly how many months of cash you have left, recalculated every day.

Ask your CFO anything
Pulse Agent flags what changed and answers follow-up questions in plain language.

Spend, decoded
A monthly breakdown of where the money went, without opening a spreadsheet.

One dashboard to start. Built to grow.

Runway, spend and today's alerts on a single screen. New modules plug into the same grid.

Open Dashboard

the essentials, ready to grow.

Read-only access: Pulse sees balances and transactions, but can never move money. Encrypted end to end, SOC 2 Type II.

One financial core
Every bank, card and wallet in one live balance.

Forecast & runway

Spend analytics

Watchdog

Awesome project!

Hadeed Ullah · a day ago
Letting founders ask plain-language questions about cash, spend and runway instead of digging through dashboards is a smart framing for Pulse. The anomaly flagging on a single live view feels like the right priority for early-stage teams.

Emaay Labs | Shopify E-commerce Design · 2 days ago
The user flow feels natural and well considered from start to finish.

Creative Snoop PRO · 2 days ago
Excellent work!

six2eight PRO · 2 days ago
The dashboard looks clean, and the overall design feels smooth and easy to follow.

Mariia Tytarenko PRO · 3 days ago
Awesome job!:)

Polina Levashova PRO · 3 days ago
Great work! Nice user flow with strong composition and visual!

Usf Satoor PRO · 3 days ago
👏

Mariia Revina · 3 days ago
Great presentation.

Viktoriia Parii · 3 days ago
Amazing work! Love the sleek UI, clean layouts, and futuristic fintech aesthetic. Super inspiring!
